

DuPont™ Prequel™

herbicide

Excellent burndown plus residual control

DuPont™ Prequel™ herbicide, applied as a burndown or preemergence treatment in corn delivers:

- Burndown plus residual control of winter annuals, early spring grasses and broadleaf weeds, even under cool, wet conditions
- Two modes of action to improve control of glyphosate or ALS-tolerant/resistant weeds
- Dry formulation, no pumps, tanks or meters needed

Rate recommendation

DuPont™ Prequel™ 1.66 oz/A (40 acres per bottle)

For burndown, the addition of a non-ionic surfactant or crop oil concentrate and ammonium nitrogen fertilizer is recommended.

Application Information

- Add in a DuPont™ Cinch® or Breakfree® brand product for additional control from your preemergence program.
- Can be followed postemergence with DuPont™ Steadfast® Q, Require® Q (mp) or Resolve® Q herbicides with appropriate tank-mix partners.
- Prequel™ may be applied up to 30 days prior to planting, on soil surface, or uniformly incorporated in the top two inches of soil before planting.

Field in Southeast Iowa, near Columbus Junction, 2008

April 30, 2008

May 20, 2008

June 10, 2008

Prequel™ 1.66 oz/A + atrazine 1 lb/A + AMS 2 lbs/A + 1% COC. Applied April 29, 2008. Weeds present include dandelion, winter annual grasses and shepherd's-purse.
